TENTH EDITION
SEPTEMBER 1964

*One Nelson's
Old Structure*

This edition marks the first ten years of "Who's Who" which began as a guide for new apprentices and has now established itself as a reference booklet in almost every office. Copies are to be found in all parts of the globe from the Far East to the New World.

The tenth edition contains no marked changes from the previous one but does include some extra titles and names. Organisation and personnel changes are always taking place and so we welcome any information or suggestions for incorporation into future editions.
